

# MANE

## Hair Fibres

Mane Hair Fibres have been scientifically developed to give you a natural looking, fuller head of hair in seconds. They can be used for all normal life-style activities (except water sports) and when used in conjunction with the Mane Seal and Shine are rain, wind and perspiration resistant. They are safe to use and will have no negative impact on your hair.

Mane Hair Fibres Before and After

For best results when using Mane Hair Fibres, we recommend using Mane Seal and Shine

## How to Use and Shades

1. Wash and condition your hair. Using a conditioner is important to create a suitable surface for the fibres to adhere to. Dry and style as normal.
2. Shake the container well. Remove the lid and hold the container approximately 3cm above the scalp.
3. Sprinkle the fibres generously over the area to be thickened until the level of coverage is achieved.
4. Pat your hair gently to help the fibres settle. Add more fibres if more coverage is desirable. If you wish to re-style then use a wide toothed comb so as not to disturb the fibres.
5. When the desired level of coverage is achieved, maintain in place by using Mane Seal and Shine Spray for a light, natural looking finish. (NB. conventional aerosol sprays will blow the fibres away).
